An Introduction to Research Justice
Data Center
An Introduction to Research Justice is intended for community organizers to apply tools and concepts of Research Justice to organizing. This toolkit encourages marginalized communities to recognize their own expertise and to develop their own analysis of the issues that impact them.

Coalition of Communities of Color
Research and Data Justice
The Research Justice Institute (RJI) and the Coalition of Communities of Color (CCC) believe that decolonizing research and data is a crucial part of realizing systemic change for Black, Indigenous, and People of Color (BIPOC) communities.

Department of Health, Education, and Welfare
The Belmont Report: Ethical Principles and Guidelines for the Protection of Human Subjects of Research
Created by the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research to identify the basic ethical principles that should underlie the conduct of biomedical and behavioral research involving human subjects and to develop guidelines which should be followed to assure that such research is conducted in accordance with those principles.

International Arctic Social Sciences Association
IASSA Principles and Guidelines for Conducting Ethical Research in the Arctic
All scientific investigations in the North should be assessed in terms of their potential human impact and interest. Social science research, particularly studies involving human subjects, requires special consideration, as do studies of land and resources that have economic, cultural, social and spiritual value to Indigenous peoples.

Introduction to Research Justice

Minnesota Campus Compact

Participants will understand how we use research in our daily lives, understand core attributes of various types of knowledge and the political legitimacy assigned to each type, identify structural inequities in research that maintain certain power relationships, understand basic principles of research justice, understand how we can strategically control knowledge flow in society and control knowledge production to achieve our goals.

The Norwegian National Research Ethics Committees

Guidelines for Research Ethics in the Social Sciences, Humanities, Law and Theology

The purpose of the guidelines for research ethics is to provide researchers and the research community with information about recognised norms of research ethics. The guidelines provide guidance and advice. They are intended to help develop ethical discretion and reflection, to clarify ethical dilemmas, and to promote good scientific practice. They are also intended to prevent scientific misconduct. They may be used as tools in the assessment of individual cases, in the planning of research projects, or when reporting and publishing findings and results.
